

North Shore Key Club Lights the Way For learning At Harbor Day

The North Shore Key Club is busy planning their single service project for 2009-2010. They have selected a unique project that will have two part and will focus their efforts for the Harbor Day Care Center in Glen Head NY. This project includes inspiring the creativity of children by using the 5 senses.... sight, feel, touch, hearing & taste and will further their mental development as well as help them grow into strong individuals and outstanding citizens. This project will help children learn about something that they use everyday and will make them see how amazing their senses actually are. Pictured are Key Clubbers and Harbor Day Care children working on part one of the project; building structures that relate to the 5 Senses.
